Description:

Bring a hint of Nordic style into your kitchen with the modern Desco dog feeder. Designed by Mathias De Ferm exclusively for MiaCara, the Desco feeder is made from bent plywood and available in 5 stylish colours to suit any interior.

Designed to satisfy both dog and owner, the Desco features all the clever details you have come to expect from MiaCara. Silicone buffers keep the bowls in place to avoid rattling while your dog eats, and the dog feeder comes with slip-proof silicone feet to stop it moving around.

The Desco comes in two different sizes to enable dogs of all sizes to eat comfortably, and features two stainless steel bowls that are dishwasher-safe and also available separately.

Design: Mathias De Ferm

- Ash Grey Stained
- Walnut

Ash Natural Ash White Ash Black

Ash Grey Walnut

Material:

- Bent plywood
- Stainless steel bowls (dishwasher-safe)
- Silicone buffers
- Slip-proof silicone feet

Care Instructions:

The Desco dog feeder is made from plywood. Some discoloration of the surface may occur. Wood is a natural product and can warp. In order to prevent damage, please to not expose the dog feeder to damp, strong insolation or extremes of temperature. Please keep sharp or rough objects away from the feeder in order to prevent scratching. The wooden dog feeder is not suitable for dogs who are fond of chewing wood. For these dogs, we recommend the Desco dog feeder made from powder-coated aluminium instead. Please note that the dog feeder is not designed to carry heavy loads, so please do not stand on it.

To clean the dog feeder, simply wipe it with a soft damp cloth, or with a suitable wood polish. Please remove any liquids or wet food right away and avoid the use of harsh cleaning products.

Clean the stainless steel bowl thoroughly before use. Only the bowls are dishwasher-safe.

The included silicone feet can be used to ensure that the product stays in place. To apply the silicone feet to the product, carefully remove the protection film from the self-adhesive surface and fix the silicone feet to the bottom of the product.

Caution: The silicone feet may cause a chemical reaction on treated or on natural surfaces. In rare cases, this reaction can cause stains on the floor. Please make sure that your floor is suitable for the use of silicone feet, or place the product on a floor protection mat.
