

ACX Soft

Environmental Product Passport

The information in this product passport is only valid for the following variant:

ACX Soft – Art. no. 43300300

For additional information about ACX Soft, visit our [website](#)

More details about Vitra's environmental mission are available at vitra.com/about-vitra.

Carbon footprint

The carbon footprint stands for the amount of greenhouse gas emissions (also referred to as carbon emissions) generated throughout a product's entire life cycle. The carbon footprint is most commonly expressed in CO₂ equivalents (CO₂e) as a standard measure for the warming effect of all greenhouse gases.

●	Raw materials, incl. extraction and processing	97.0	89.71%
●	Production, incl. manufacturing and assembly	1.6	1.5%
●	Distribution, use and maintenance, end of life and disposal	9.5	8.8%
Total / kg CO₂e		108.1	100%

This calculation includes emissions from direct suppliers (Tier 1). Total may vary slightly from 100% due to rounding.

Recycling

Following the principle of the circular economy, Vitra uses the largest amount of recycled and recyclable materials possible. This proportion will increase as a result of ongoing product development.

Recyclability

100%

The plastic mixture for ACX is still being optimised. The proportion of recycled material can only be definitively calculated once the current optimisation process has been completed.

Further information including a glossary of terms is available at www.vitra.com/sustainability.

Material Composition

Vitra uses a wide range of materials that must all withstand stringent internal and external testing procedures. If a new material is found that is better for the environment and meets Vitra's quality criteria, suitable products are executed in that material.

● Polyamide (glass-fibre reinforced)	39.6%
● Polypropylene (glass-fibre reinforced)	29.0%
● Steel	19.4%
● Polyester	9.3%
● Aluminium	2.6%
● Other thermoplastics	0.1%
Total	100%

Total may vary slightly from 100% due to rounding.

Packaging and logistics

Vitra uses detailed information to elaborate targeted optimisation of transport routes. Preference is given to rail transport, and Vitra aims for the most efficient capacity management possible when using lorries.

Packaging serves to protect the product and minimise the transport volume. Packaging is reduced wherever possible and materials are optimised in terms of their impact on the environment.

Packaging and materials	Purpose	Weight
1 plastic bag made of min. 50% recycled polyethylene	Protection from dust, humidity and scratches	205 g
Polyethylene foam made from 50% recycled	Surface protection for formfit seat F	400 g
Cardboard box, FSC-certified made of min. 50% recycled paper	Product protection and stackability	570 g
Semi-assembled version in compact cardboard box	Product protection and less transport volume	6500 g

Supply chain

Vitra purchases its raw materials and components almost exclusively from suppliers in Europe, which simplifies compliance with uniform statutory standards and shortens transport routes. Vitra maintains long-term relationships with many of its suppliers, some spanning several decades, which is a key advantage for the further development of products, technologies and materials.

100%
European
suppliers
100%
assembled in Europe

This map and percentage calculation represents Vitra's direct suppliers (Tier 1). Total may vary slightly from 100% due to rounding.

Provenance of Components

1 Germany	46.3%	3 Romania	8.26%
Mechanical unit	39.75%	Gas spring	8.26%
Formfit seat F	3.24%		
Castors	3.31%	4 Lithuania	6.09%
		Backrest cover	4.50%
2 Italy	39.35%	Seat cover	1.59%
Backrest frame	15.20%		
Base	13.21%	Assembly	
Fixed armrests	10.94%	vitra.	
		Weil am Rhein, Germany	100.00%

Certificates

To offer transparency with regard to a product's most important environmental factors, Vitra provides certificates from external testing institutes. For this purpose, Vitra focuses on a selection of certificates that explicitly cover key elements of the respective product.

Greenguard

The GREENGUARD label for indoor air quality recognises products that contribute to the creation of healthier indoor environments.

GS

With the GS seal for tested safety, a state-authorised inspection institute certifies the suitability and safety of the construction and monitors production at regular intervals.

Ergonomics Approved

The 'Ergonomics Approved' certificate confirms the fulfilment of ergonomic requirements and testing criteria that exceed the minimum legal regulations for office swivel chairs.

BIFMA

ACX Soft fulfils the ANSI/BIFMA standard X5.1-2011, thus meeting the stringent safety requirements for the US market.

BIFMA

EPD

An EPD – environmental product declaration – provides transparency about the environmental impacts of a product throughout its life cycle, often referred to as life cycle assessment (LCA).

Spare parts

Castors and glides can be ordered directly from the vitra.com website. [Link to online shop](#)

For other spare parts, please contact Vitra or your local Vitra partner.

Further Information and Contact Details

The information in this product passport is only valid for the following variant:

ACX Soft – Art. no. 43300300

Backrest Quilted Knit, colour nero,
seat Grid Knit nero, colour nero,
with lumbar support,
with forward tilt, with seat depth adjustment,
formfit seat F,
frame colour deep black,
fixed armrests,
five-star base, plastic,
hard castors, braked, for carpet
