Technische Hinweise

– Beim Leuchtmittelwechsel immer Stecker ziehen, um die Stromzufuhr zu unterbrechen.

– Achtung: Leuchtmittel vor dem Wechsel auskühlen lassen.

– Im Betrieb und bis zur Auskühlung nach dem Ausschalten besteht beim Leuchtmittel und angrenzenden Teilen Verbrennungsgefahr.

– Nicht direkt ins LED Licht schauen.

– LEDs sind druck- und säureempfindlich; nicht berühren oder belasten.

– Eingangsspannung
90–254 V/50–60Hz

– Leuchtmittel
UV-Stop

– Leuchte darf nicht im Freien verwendet werden

– Schutzklasse I

LED

– Inside 4 x 5 W
2700 - 4000 Kelvin

– Top 1 x 28 W
3000 - 4000 Kelvin

– Stand-by < 0.5 W

– Technische Konformität
gemäss EN-Richtlinien

Technical Information

– When replacing the lamp, always unplug it to interrupt the power supply

– Note: always allow the lamp to cool before replacing it.

– While the lamp is on and until it has cooled, there is a risk of burns from the lamp and adjacent elements.

– Do not look directly into the LED lamp.

– LEDs are sensitive to pressure and acid; do not touch or put pressure on it.

– Input voltage
90–254 V/50–60Hz

– Lamp
UV-Stop

– Lamp must not be used in the open

– Safety class I

– Inside 4 x 5 W
2700 - 4000 Kelvin

– Top 1 x 28 W
3000 - 4000 Kelvin

– Stand-by < 0.5 W

– Technical conformity according to European Standard guidelines

Indications techniques

– Lors du remplacement de la source lumineuse, enlevez toujours la fiche de la prise électrique pour couper l'alimentation électrique.

– Attention : laissez la source de lumière refroidir avant de procéder à son remplacement.

– Lorsque la lampe est allumée et jusqu'à son refroidissement après débranchement, il y a un risque de brûlure sur la lampe et les éléments proches.

– Ne regardez pas directement dans la lumière des diodes.

– Les diodes sont sensibles à la pression et à l'acidité ; ne pas toucher ni presser.

– Tension d'entrée
90–254 V/50–60Hz

– Ampoule
UV-Stop

– Ne pas utiliser la lampe à l'extérieur

– Classe de protection I

– Inside 4 x 5 W
2700 - 4000 Kelvin

– Top 1 x 28 W
3000 - 4000 Kelvin

– Stand-by < 0.5 W

– Conformité technique selon les directives EN

Pflege Hinweise

– Bitte reinigen Sie die Leuchte ausschliesslich mit dem beigelegten antistatischen Tuch.

– Achtung: Leuchten nur mit handelsüblichen, nicht aggressiven Reinigungsmitteln reinigen. Alkohol, Benzol, Aceton oder Säuren können die Oberfläche beschädigen.

Care instructions

– Only clean the lamp with the supplied antistatic cloth.

– Note: Only clean the lamps using commercially available, non-aggressive cleaning agents. Alcohol, benzene, acetone or acids may damage the surface.

Notice d'entretien

– Nettoyez la lampe uniquement à l'aide du chiffon antistatique fourni..

– Attention: Nettoyez les lampes uniquement avec des produits nettoyants non agressifs disponibles dans le commerce. Alcool, benzène, acétone et acides peuvent détériorer la surface.

Technische aanwijzingen

- Bij vervanging van de lichtbron altijd de stekker uit het stopcontact trekken om de stroomtoevoer te onderbreken
- Let op: Laat de lichtbron afkoelen voordat u hem vervangt.
- Als de lamp aan staat en tot afkoeling na het uitschakelen bestaat verbrandingsgevaar aan de lichtbron en de onderdelen eromheen.
- Niet rechtstreeks in het licht van de LED kijken.
- LEDs zijn gevoelig voor druk en zuur; niet aanraken of belasten.

- Ingangsspanning
90–254 V / 50–60Hz

- Lamp
UV-Stop

- De lamp mag niet in openlucht gebruikt worden

- Beschermingsklasse I

- Inside 4 x 5 W
2700 - 4000 Kelvin
- Top 1 x 28 W
3000 - 4000 Kelvin
- Stand-by < 0.5 W

- Technische gelijkvormigheid volgens EN-richtlijnen

Informazioni tecniche

- In caso di sostituzione della fonte luminosa, togliere la spina dalla presa per interrompere l'alimentazione
- Attenzione: Far raffreddare la fonte luminosa prima della sostituzione.
- Quando la lampada è accesa e nel periodo tra lo spegnimento e il raffreddamento, la fonte luminosa e i componenti vicini possono provocare ustioni.
- Non guardare direttamente la luce della lampadina LED.
- I LED sono sensibili alla compressione e all'acido; non toccare e non esercitare pressione.

- Tensione di alimentazione
90–254 V / 50–60Hz

- Lampadina
UV-Stop

- La lampada non può essere utilizzata all'aperto

- Classe di protezione I

- Inside 4 x 5 W
2700 - 4000 Kelvin
- Top 1 x 28 W
3000 - 4000 Kelvin
- Stand-by < 0.5 W

- Conformità tecnica secondo le Direttive EN

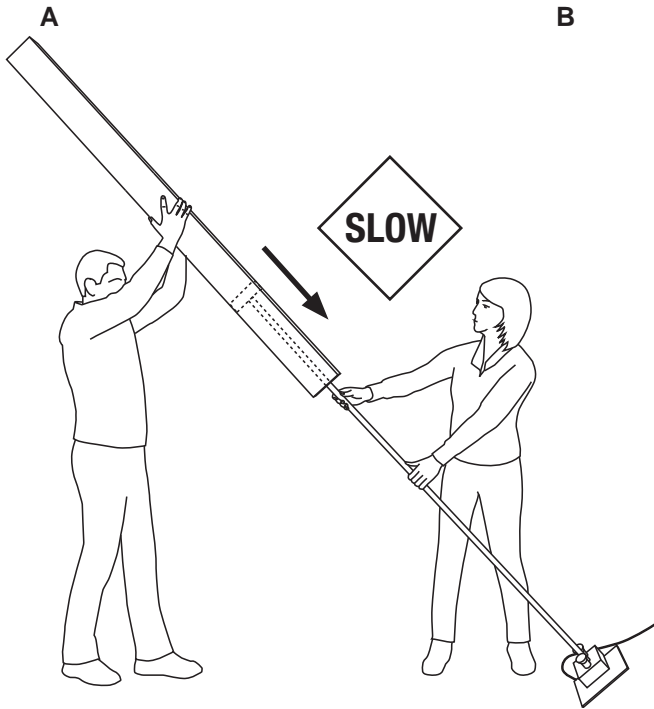

Onderhoudsinstructie

- Reinig de lamp uitsluitend met behulp van het meegeleverde antistatische doekje.
- Let op: Reinig de lampen uitsluitend met in de handel verkrijgbare, niet-agressieve schoonmaakmiddelen. Alcohol, benzeen, aceton of zuren kunnen het oppervlak aantasten.

Instrucciones de mantenimiento

- Pulire la lampada esclusivamente con il panno antistatico in dotazione.
- Attenzione: Pulire le lampade esclusivamente con detergenti neutri reperibili in commercio. Alcool, benzeene, acetone e acidi possono intaccare la superficie.
